

21/26
Sept
2026

Come and visit us
EXCLUSIVELY
at our Headquarters!

[WE WILL NOT BE ATTENDING THE TRADE FAIR]

from 21 to 26
September

**We'll welcome
you 'into
our home'**

A unique opportunity to see our technologies in action up close, exchange views with industry experts, discover success stories and explore the trends that are transforming the stone market.

Workshops, guided tours, technical sessions and opportunities for discussion: a programme designed for those who wish to look beyond the present and shape the future of their business.

An experience designed to turn a simple visit into a genuine opportunity for learning, inspiration and dialogue.

DONATONI

For years, we have been putting our customers first

Donatoni is introducing a new approach to its market presence, choosing to transform the traditional trade fair into an even more direct, tangible and personalised experience for customers and industry professionals.

And so Donatoni Stone Week was born: a whole week dedicated to meetings with customers, designed to offer a complete immersion in the world of Donatoni and allow visitors to get a close-up look at our solutions, machinery and production processes.

This decision marks an evolution in the company's communication and customer relations strategy: no longer merely a showcase, but a hands-on experience where visitors can see the technologies in action, consult directly with Donatoni specialists and explore applications and opportunities tailored to their specific production needs.

For Donatoni, the value of the meeting lies in the opportunity to give customers a first-hand experience of the entire corporate ecosystem: from technology to the expertise of the staff, and from design to production.

Seeing the machines in action in the context for which they were developed, talking to the professionals who work on these solutions every day, and gaining a first-hand insight into the production environment allows us to create a more comprehensive and meaningful experience than a simple trade fair exhibition.

A SHOWROOM TO BE EXPERIENCED

Machines in operation
from 8.30 am to 10.00 pm

- | | |
